Basic & Superfast Broadband
# Quick Start Guide

xln | fibre

To get up and running, plug in your router and follow these steps. Before you start, check which type of telephone socket you have by looking at the diagrams below.

Step 1

Connection types

Look at your telephone socket.

- Socket styles **(A)** and **(B)** - No DSL filter needed.

- Socket style **(C)** - DSL filter underline essential.
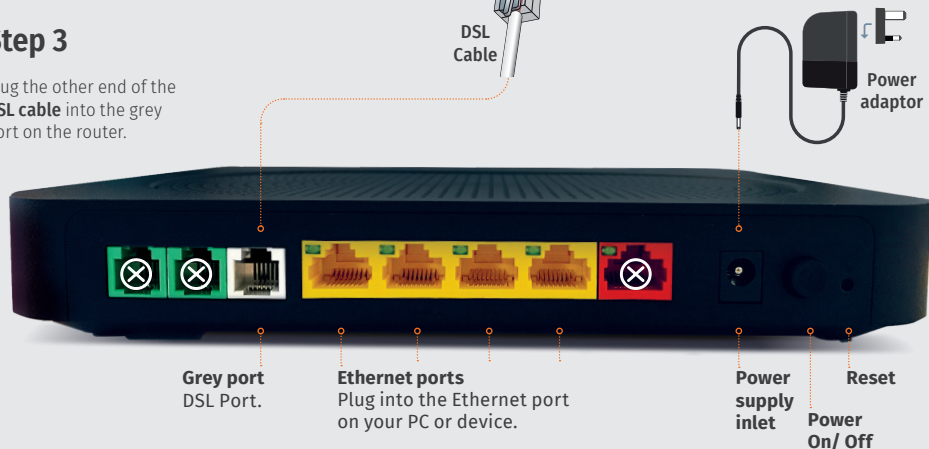

Step 2

Plug the **DSL cable** directly into the sockets illustrated on either Socket A or B, or into the DSL filter for Socket C.
Step 3

Plug the other end of the **DSL cable** into the grey port on the router.

A **B** **C**

DSL Filter

DSL Cable

Power adaptor

Grey port
DSL Port.

Ethernet ports
Plug into the Ethernet port on your PC or device.

Power supply inlet

Power On/ Off

Reset

First things first
Your wireless settings
are underneath your router.

Setting up wireless connectivity

Connecting all your devices to your new connection
is easy. Just follow these simple steps:

1 Using your wireless enabled device, such as a laptop,
smartphone or tablet, search for your available
wireless networks.

2 From the list of available wireless networks, select
'XLN For Small Biz' and then enter your unique
password that can be found on the bottom
of your router.

**Please note, this is different to setting up
and using Public Wi-Fi.**
